Introduction:

Resin concave diamond grinding and polishing pad use for high-quality diamond powder machine and resin binder material, with superb technology and advanced production technology and
production is mainly used for a variety of shapes of natural stone or artificial stone polishing process can also be used for decorative stone cleaning, repair and update . It can be flexible with the
needs and habits in various hand grinder, floor refurbished machines, ceramic polishing machine, grinder, grinding machines horizon. Grinding order:From coarse to fine resolution number, the
last polish,UntilGet overpolishingeffect.

Features:

1.Resin concave diamond grinding and polishing pad has good sharpness and durable, stable quality, long life, high efficiency, good surface polishing, nontoxic do not fade; widely used in stone processing, floor treatment, ceramic tile production industry.
2.Curved DiamondMill with a complete specification sheet size color and good flexibility, handy in granite, marble, artificial stone line, chamfer, arc board and special-shaped stone processing, a variety of shapes, sizes available, various size No easy to identify, it can be flexible with the needs and habits of various hand grinder, ground refurbished machine, ceramic polishing machine.

specification:

The following are general specifications Resin concave diamond grinding and polishing pad:

diameter	thickness		granularity	Connection
	Handheld	Flooring		
80mm (3 ")	2-3.5mm	8-12mm	50 #, 100 #, 200 #, 400 #, 800 # 1500 #, 3000 #, Buff	Velcro
100mm (4 ")				
125mm (5 ")				
150mm (6 ")				
180mm (7 ")				

Other specifications can be customized according to requirements.
