## Introduction:

4inch Diamond Polish Pad Vacuum Brazing, the diamond particles are firmly welded to the base body or a tire body, diamond never fall off, so it is very sharp.life is 2 times more than the Electroplated type, suitable for the superhard materials, glass, ceramics, stone, diamonds, etc.Compare to brazed diamond cup wheels, they are as aggressive with less noise. compare to resin bond or metal bond diamond polishing pads, they are mover aggressive and efficient They can also be used for glass and swimming pool surfaces.

## Feature:

1.The grinding effect is more uniform and the grinding efficiency is higher;
2.Suitable for the superhard materials, glass, ceramics, stone;
3.Rubber layer on the back of this pad, is used to slow down the impact and vibration during the grinding process.
