Introduction:

These diamond edge cutting blade and segment are mainly used for cutting microcrystal stone and other hard,crisp stone.

Features:

1.Higher cutting efficiency than general segment blade.

2.The special design will not allow easy edge collapse,break,tapered slab etc.

Specifications:

The followings are the normal specifications of three step segment edge cutting blade:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Dimension (mm)	Segment Number	Application
Edge Cutting Blade For Microcrystal Stone	Ø300	1.8/2.0	43/40*3.2*10	22	Microcrystal stone
	Ø350	2.0/2.2	43/40*3.2*10	26	

The above specifications are for reference, other specifications can be ordered by customers.
