Introduction:

These diamond edge cutting blade with W shaped segment are widely used for cutting granite and many other hard stone,mainly used in bridge cutting machines and infrared cutting machines.

Features:

1.Unique W design of segment,the V slot allows ideal debris removal and better cooling,reduces cutting friction,which will keep good cutting sharpness and high cutting efficiency.Besides,this creative design will minimize cutting noise.

2.Good cutting result. These special design will not allow easy edge collapse,break,tapered slab etc.

3.Excellent comprehensive cutting performance.

Specifications:

The followings are the normal specifications of our diamond edge cutting blade with W shape segmen t:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Dimension (mm)	Segment Number	Application
Diamond Edge Cutting Blade With W-shaped Segment	Ø300	2.2/2.0	40*3.2*10(15,20)	21	Granite
	Ø350	2.4/2.2	40*3.2*10(15,20)	24	
	Ø400	2.8/2.4	40*3.6*10(15,20)	28	
	Ø450	2.8/2.6	40*4.2*10(15,20)	32	
	Ø500	3.2/2.8	40*4.2*10(15,20)	36	
	Ø550	3.2/3.0	40*4.2*10(15,20)	38	
	Ø600	3.6/3.2	40*4.6*10(15,20)	42	
	Ø650	4.0/3.6	40*5.0*10(15,20)	46	
	Ø700	4.0/3.8	40*5.2*10(15,20)	50	
	Ø800	4.5/4.2	40*6.0*10(15,20)	57	

The above specifications are for reference, other specifications can be ordered by customers.
