

Introduction:

Diamond alloy bush hammer are suitable for stone or concrete surface grinding, with perfect surface fabricating. The diamond alloy bush hammer are widely used for grinding a range of Peel-like anti-slip surface for granite, marble, concrete, limestone, natural stone etc. improved the processing technology of Litchi surface fundamentally, which makes a well-proportioned slab of the stone.

Features:

1. To create anti-slip surfaces.
2. To remove old glue and resin coatings, in particular thick resins.

Specifications:

Metal Alloy Bush Hammer

Item Name	Bush Hammer	
Specification	D.125x3Tx30s	D.300x6Tx45s
	D.150x4Tx30s	D.350x9Tx45s
	D.200x4Tx45s	D.400x9Tx45s
	D.250x5Tx45s	D.450x12Tx45s
Remark	D means the diameter of plate	
	T means the roller quantity in per bush hammer	
	S means the No.tips per roller	

Other specifications can be customized.
