Introduction:

Diamond arrayed cutting blade and segment are widely used on various power machines and environments. The diamond particles are placed in order, so the blade can get a sharper and durable cutting performance, offer 30% to 100% more cutting life.

Features:

- 1. Cutting efficiency improves 30% more, energy consumption reduce 30% more.
- 2.Good cutting, fast cutting and long lifespan.
- 3. This type of blade can effectively reduce noise and protect the environment.

Specifications:

The followings are the normal specifications of our diamond arrayed cutting blade and segment:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Dimension (mm)	Segment Number	Application
Edge Cutting	Ø300	2.2	43/40*3.2*15(20)	21	Granite
	Ø350	2.2	43/40*3.2*15(20)	24	
	Ø400	2.6	43/40*3.6*15(20)	28	
	Ø450	3.0	43/40*4.0*15(20)	32	
	Ø500	3.0	40*4.0*15(20)	36	
	Ø600	3.6	40*4.6*15(20)	42	

The above specifications are for reference, other specifications can be ordered by customers.
