

Introduction:

Bush hammer rollers are used on bush hammer plates on manual grinding machines or auto/semi-auto bush hammered machines to process bush hammered litchi surface on granite, marble and other stone surface. The processing surface can be very uniform and seems real and natural. These bush hammer rollers can be changed conveniently, greatly reduced the production costs.

Features:

1. High grinding efficiency.
2. Long lifespan.
3. Uniform, real and natural processing surface.
4. Much lower production costs compared with traditional processing method.

Specifications:

The followings are the normal specifications of our bush hammer rollers:

Product Name	Outer Diameter	Segment Quantity	Type
	mm		
Bush Hammer Roller	32	30	With grease nipple
	45	45	Without nipples
	60	60	
	Frankfurt Roller	60	

Other specifications can be ordered by customers.
