

Introduction:

Diamond edge cutting blade with U gullet design on segment circumference allows extremely

high cutting efficiency.

Besides, this creative design of segment structure reduces blade stone interface while cutting, decreases cutting friction. Meanwhile, it makes ideal debris removal and better cooling, reduces frictional heat gain and noise produced by resonance effectively.

Mainly used for cutting and splitting granite and other hard stone.

Feature:

Fan Edge Cutting Blade And Segment With U Gullet

1. Good continuity, effectively reduce the distance between teeth.
2. Further Strengthen the effect of trimming, reduce the loss of stone.
3. This segment will improve the sharpness and cutting efficiency.
4. Good cutting result. This special design will not allow easy edge collapse, break, tapered slab etc.
