

Introduction:

Diamond screw core

bit this is mainly used for the center diamond drill screw holes, vias, blind holes trimming, and milling slots on stone slabs such as kitchen panel, washbasin, etc. This finger bit tip is fabricated with a 1/2" Gas thread connection. Suitable for portable drilling rig and CNC machine tools. Flexible front screw drill replacement, as required to select and adjust the drill pipe substrate, in order to achieve a change in terms of length.

In addition, the screw bit worn away only need to replace the drill part, the drill pipe can continue to use the base. There are water holes in the side, it can easy to drainage and cooling.

Features:

1. high efficiency, durability, and security
2. easy bit changing, aggressive diamond bond for fast

Specifications:

The followings are normal specifications of our screw core bit:

Product Name	Type	Diameter	Segment Length	Thread	Connection Shaft
Diamond Core bit	Hollow	20mm	20mm	M12	1/2"G*68L
	Solid		30mm		1/2"G*100L

The above specifications are for reference, other specifications can be ordered by customers.
