

Introduction:

Diamond conical wheel for ceramic is most commonly used to calibrate and achieve a uniform thickness on ceramic tiles surface before polishing.

It can equal the thickness and smoothness of the ceramic tiles materials with high sharpness, good wear-

resistance and low noise.

Features:

- 1.It can be for different ceramic polishing
- 2.It is friendly to environment,lower noisy.
- 3.Grinding with high efficiency and good performance.

Specifications:

The followings are the normal specifications of our diamond conical wheel for ceramic:

Length(mm)	Diameter(mm)	Segment Width (mm)	Segment Height (mm)	Spiral Number	Grit
400	180-260mm	9mm	12mm	5 or 7	Rough
450					Medium
500					Fine
600					
800					
1000					
1200					

The above specification just a reference for clients.Other specifications can be ordered by customers.
