

Introduction:

Diamond drill bolt back for wall, combined with back bolt hit the (extension) hole machine used to make the vertebral column

drills and special apparatus for forming eccentric drilling operation, and enables the bottom reaming, stone drilled in the back outside a small hole in a large inverted cone, Make sure the drilling depth and size. The diamond drill bolt back

hole punch and extension work for a variety of stone, ceramic plates, glass, sheet metal, marble and other boards. The diamond drill back bolt mount inverted cone-shaped hole after the torque diffuser, so the diffuser

ring to open and fill the bottom of the hole, forming a convex combination. Use back bolt through the connector is mounted on the stone skeleton.

Features:

1. drilling speed, high efficiency, without damaging the object being drilled, comprehensive cost-effective;
2. Using nanotechnology, dressing carborundum abrasion resistance, so as to achieve the number of drilling more, pass beautiful, clean, a bit can drill more than 200, long service life;
3. For now stone walls, all dry hanging back bolt hole glass curtain wall engineering needs.

specification:

There are normal specification of diamond drill bolt back for wall:

Product code	Head Diameter	Connection
BW-DBB-00	8.5MM, 9.5MM, 10.2MM, 10.3MM, 10.5MM, 10.8MM, 12.3MM, 12.5MM, 12.8MM	M6 M8

The above specification just a reference for customers. Other specification can be ordered by customers.
