

Product Description:

Brief Introduction:

The deburring machine is used for removing burr of diamond segments after sintering, it can also be used for removing burr of some other solid block materials.

Features:

- 1* Simple structure, low failure rate.
- 2* The machine itself is not very noisy,.
- 3* Low power consumption.

All of our products have been strictly tested before access to market.

Other specifications can be customized according to requirements.

Details:

Specification of diamond segment deburring machine:

Parameters	Numerical
Type	BWM-DM01
Power supply voltage	220V / 380 V
Motor power	750 W
Speed	29 RPM
Volume / truck	25 KG
Weight	60 KG
Equipment dimensions	950*450*750 mm

Other specification can be customized according to need
