

Plot:

D75 diamond wheel use zero toleranceTimeGrinding fast, stable balance of zero vibration, the main role is in the inside edge before polishing to remove excess portions of granite and other hard stone, To prepare for subsequent polishing. Zero tolerance wheel classification includes Nodal, zero tolerance wheels, metal wheels and continuous zero tolerance, zero tolerance wheel resin-filled, resin polishing wheel zero tolerance. Used in the grinding and polishing stone countertops, kitchen countertops sink hole when cutting, it will leave rough edges,Then use drums to grinding and polishing, it is the most effective tool. We produce Various types and specifications drum (zero tolerance wheel), a single layer of vacuum brazed drum, drum multilayer vacuum brazing,Zero tolerance wheelsIs designed polished granite, marble, quartz Edges worn away the excess stone, this tool is the fastest way to cut out the sink hole after removal of excess material.

Features:

- 1. High efficiency, long life, high speed grinding
- 2. The balance, high stability

Technical Parameters:

Below is a general specification of our zero tolerance diamond wheel:

Model	Diameter	Granularity	Types of	Segment Length	Interface
BW-ZTW-M01-01	25mm (1 ")	Crude Fine Fine grinding	Wet or dry use with	20mm 35mm 45mm	M14 5/8 "-11 1/2 "G
BW-ZTW-M01-02	50mm (2 ")				
BW-ZTW-M01-03	75mm (3 ")				
BW-ZTW-M01-04	100mm (4 ")				

The above specifications are for reference only, other specifications can be customized by customer demand
