

Introduction:

Resin filled diamond cup grinding wheel is designed for grinding and shaping surfaces, corners, edges and angles of granite, marble and other natural stones. Resin filling provides excellent support to the segments and makes grinding extremely smooth.

Especially suitable for leveling, grinding, polishing or repair jobs where a smooth finish is required.

Features:

1. Resin filled diamond segment design can provide extremely smooth and flat surface.
2. Applicable for most angle grinders.
3. Good balance and stable performance.
4. High efficiency and long lifespan.

Specifications:

The following are the normal specifications of our resin filled diamond cup wheels:

Product Name	Diameter	Connection	Segment Height	Grit No.
Resin Filled Diamond Cup Grinding Wheel	4" 105mm	5/8"-11	5-10 mm	Rough(30#)
	4.5" 114mm	M14	5-10 mm	Medium(60#)
	5" 125mm	Snail Lock	5-10 mm	Smooth(120#)
	6" 150mm		5-10 mm	

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Premium.
