

Introduction:

Diamond turbo concrete saw blade with reinforce teeth is used on manual hand held cutting machines for cutting concrete and other general construction materials.

Features:

1. Universal dry or wet cutting blade;
2. Sintered teeth offer fast and sharp cutting;
3. Reinforce teeth segments can protect matrix.

Specifications:

The following are the normal specifications of diamond turbo concrete saw blade with reinforce teeth.

Outer Diameter(mm)	Bore(mm)	Segment Height(mm)	Applications
4'=100	16	8/10/12	Concrete and other hard building materials
4.3'=110	2	8/10/12	
4.5'=115	22.23	8/10/12	
5'=125	25.4	8/10/12	
6'=150		8/10/12	
7'=180		8/10/12	
8'=200		8/10/12	
9'=230		8/10/12	

The above specifications are for reference, other specifications can be ordered by customers.
