

Introduction:

Diamond cutter, drill, also known as CNC milling, CNC or arm mounted on the machine, used for through-hole, blind hole milling, trimming. For milling and trimming glass, artificial stone, marble and other engineered stone, suitable for high speed milling.

Features:

- 1. The use of high-quality diamond brazed, very suitable for milling stone, glass and other materials.
- 2. The diamond protrusion uniform, sharp, high milling efficiency.
- 3. Each center has a water hole drill is conducive to chip and cooling, and thus has a long service life.
- 4. Which products are of good quality, and more for export, to give a number of countries and regions, Europe and America, Brazil received.

Specification:

The following are the specifications of our conventional vacuum brazed diamond finger drill:

Diameter	Connector	Length
22mm (1-1 / 5 ")	Thread 1/2-G	40mm / 50mm / 60mm / 65mm
22mm (1 ")		
30mm (1-1 / 4 ")		
35mm (1-3 / 8 ")		
40mm (1-5 / 8 ")		

We also can be customized according to customer specifications processing size.
