180 **Handheld Cutting Machine:**

Handheld cutting machines are used for cutting stone, concrete, and masonry. They are typically used for small-scale projects and are available in various sizes and configurations. The most common handheld cutting machine is the angle grinder, which is used for cutting and grinding. Other handheld machines include reciprocating saws and diamond-tipped saws. These machines are designed to be portable and easy to use, making them ideal for DIY projects and small-scale construction work.
