The diamond saw blades are designed for cutting concrete and asphalt, and are available in various diameters and thicknesses. The blades are made of high-quality materials and are designed to provide long life and high efficiency. The blades are available in various diameters and thicknesses, and are designed to provide long life and high efficiency.

2 The diamond saw blades are designed for cutting concrete and asphalt, and are available in various diameters and thicknesses.

1 The diamond saw blades are designed for cutting concrete and asphalt, and are available in various diameters and thicknesses.

Technical specifications:

The diamond saw blades are designed for cutting concrete and asphalt, and are available in various diameters and thicknesses.

Technical specifications:

Our products are designed to meet the needs of different materials, such as granite, marble, quartz stone, sand stone, microcrystalline stone, volcanic rock, concrete, glass, ceramic, masonry etc. Different segments recipe were been developed by our company.

Applicable materials

To meet your demands for cutting different materials, such as granite, marble, quartz stone, sand stone, microcrystalline stone, volcanic rock, concrete, glass, ceramic, masonry etc. Different segments recipe were been developed by our company.

Reinforced Concrete

Concrete Block

Rock/Granite

Refractory Brick

Hard Masonry Block

Asphalt Road
