

Segment Shape	2 Round Segments
Material:	Aluminum + Steel Segment
Dimensions:	Segment Diameter: 25mm, Segment Thickness: 2mm
Weight:	Segment Weight: 0.5g

This segment is used for the measurement of the diameter of the hole. The segment is made of aluminum and steel. The diameter of the segment is 25mm and the thickness is 2mm. The weight of the segment is 0.5g.

Segment Shape:

This segment is used for the measurement of the diameter of the hole. The segment is made of aluminum and steel. The diameter of the segment is 25mm and the thickness is 2mm. The weight of the segment is 0.5g.

This segment is used for the measurement of the diameter of the hole. The segment is made of aluminum and steel. The diameter of the segment is 25mm and the thickness is 2mm. The weight of the segment is 0.5g.

Segment Dimensions:

This segment is used for the measurement of the diameter of the hole. The segment is made of aluminum and steel. The diameter of the segment is 25mm and the thickness is 2mm. The weight of the segment is 0.5g. The segment is used for the measurement of the diameter of the hole. The segment is made of aluminum and steel. The diameter of the segment is 25mm and the thickness is 2mm. The weight of the segment is 0.5g.
