ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱᐱ:

ᐱᐱ Rhombus ᐱᐱᐱ ᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱ ᐱᐱ ᐱᐱᐱ ᐱᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱᐱ

Segment Size: 18mm*20mm*2T
Segment Shape: Rhombus

Connection Type: Polar Magnetic System; Single Hole System

30S Rhombus Segment - 30S Rhombus Segment Size: 18mm*20mm*2T, 4000 or 5500 segments per cylinder. The segments are made of a high-strength material and are designed to provide a secure connection. The segments are attached to the cylinder using a polar magnetic system. The segments are also designed to provide a single hole system.

30S Rhombus Segment - 30S Rhombus Segment Size: 18mm*20mm*2T, 2500 or 4000 segments per cylinder. The segments are made of a high-strength material and are designed to provide a secure connection. The segments are attached to the cylinder using a polar magnetic system. The segments are also designed to provide a single hole system.

30S Rhombus Segment - 30S Rhombus Segment Size: 18mm*20mm*2T, 2500 segments per cylinder. The segments are made of a high-strength material and are designed to provide a secure connection. The segments are attached to the cylinder using a polar magnetic system. The segments are also designed to provide a single hole system.

30S Rhombus Segment - 30S Rhombus Segment Size: 18mm*20mm*2T, 5500 segments per cylinder. The segments are made of a high-strength material and are designed to provide a secure connection. The segments are attached to the cylinder using a polar magnetic system. The segments are also designed to provide a single hole system.

[30S Rhombus Segment - 30S Rhombus Segment Size: 18mm*20mm*2T, 4000 or 5500 segments per cylinder. The segments are made of a high-strength material and are designed to provide a secure connection. The segments are attached to the cylinder using a polar magnetic system. The segments are also designed to provide a single hole system.](#)

30S Rhombus Segment:

30S Rhombus Segment - 30S Rhombus Segment Size: 18mm*20mm*2T, 4000 or 5500 segments per cylinder. The segments are made of a high-strength material and are designed to provide a secure connection. The segments are attached to the cylinder using a polar magnetic system. The segments are also designed to provide a single hole system.
