

PCD Segment:

PCD Segment is a trapezoidal segment used for grinding. It is made of PCD (Polycrystalline Diamond) material. The size is 20\*20\*10mm\*2T.

Two Square Segments  
Sizes:20\*20\*10mm\*2T

Quick Connecting Grinding Machine

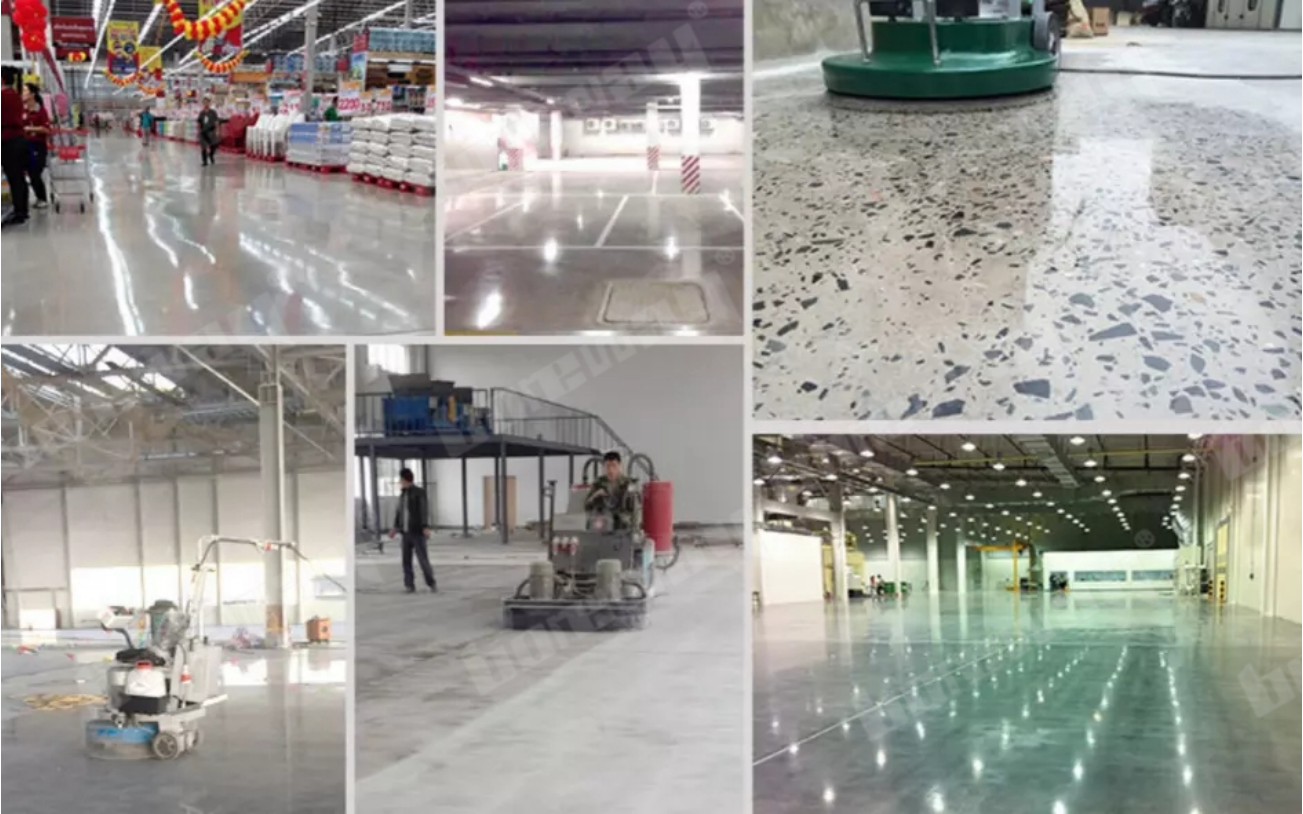

Usage:

1. The segment is used for grinding the workpiece with 6 segments.
2. The segment is used for grinding the workpiece with 8 segments.
3. The segment is used for grinding the workpiece with 10 segments.

PCD Trapezoid:

PCD Trapezoid is a trapezoidal segment used for grinding. It is made of PCD (Polycrystalline Diamond) material. The size is 20\*20\*10mm\*2T. It is used for grinding the workpiece with 6 segments, 8 segments, or 10 segments. The segment is used for grinding the workpiece with 6 segments, 8 segments, or 10 segments. The segment is used for grinding the workpiece with 6 segments, 8 segments, or 10 segments.
