

Product Description:

4inch resin bond **diamond floor renew polishing pads** Special design for Granite Marble Terrazzo concrete polishing. Suitable for both hand polishing machine and automatic polishing machine.

Dry Diamond Floor Polishing Pads for Concrete have been widely accepted as some of the best resin concrete floor polishing pads on the market. They are longer lasting and produce a great finish without leaving scratches. The set includes grits 50#, 100#, 200#, 400#, 800#, 1500# and 3000#.

Wet polishing pads are designed for polishing natural and engineered stone with a center-feed wet polisher or grinder. Wet pads are faster than dry polishing, can be used at a higher speed, and are generally more durable than dry pads. However, due to flying water and general mess they create, are often not practical for use on previously installed surfaces.

Diamond floor renew polishing pads are an excellent choice for polishing natural stone. While there is some mild dust, the lack of water for cooling the pad and stone surface makes for easier clean up. Our high quality dry pads will give the same great results and high polish as wet pads, however allow more time to get the job done than if you were using wet pads. Never use dry pads on engineered stone as the heat generated can melt the resin.

Features:

1. Wet or Dry Working;
2. Saving money and fast working;
3. High gloss finishes in very short time;
4. Non-staining and burns the surface of the stone;
5. Beveled edge design helps work on uneven floors;
6. Quickly remove scratches left by metal-bond diamonds;
7. Velcro backed, can be attached to the floor polishing machines easily.

Specifications:

Diameter:100mm/4"

Total thickness:12mm

Workable thickness:10mm

Usage:Wet or Dry Working

Available Grit size: #50, #100, #200, #400, #800, #1500, #3000

Application: Special design for Granite Marble Terrazzo concrete polishing...

(Remarks: Different grits and sizes, Different mark, logo and velcro color can be customized according to buyer's requirement.)
