

Product Description

5 inch hexagons bush hammer plate is used to grind the surface of granite, marble, concrete and other materials to a rough surface.

5 inch hexagons bush hammer plate can be sized according to their machine adjustments and adapters, and other specifications can be customized upon request.

These carbide tips are repeatedly struck on the stone or concrete surface to create a rough and pockmarked texture.

Feature:

1. Excellent performance and durability.
2. Competitive price and value for money.
3. Strict quality control to provide high quality products.
4. High grinding efficiency, coarse and fine flowers can be adjusted.

Product Specification:

The following is the specification of **5 inch hexagons bush hammer plate**:

Size	Tips Number	Material	Connector
5 Inch	30 Tips	Carbide Alloy	M14

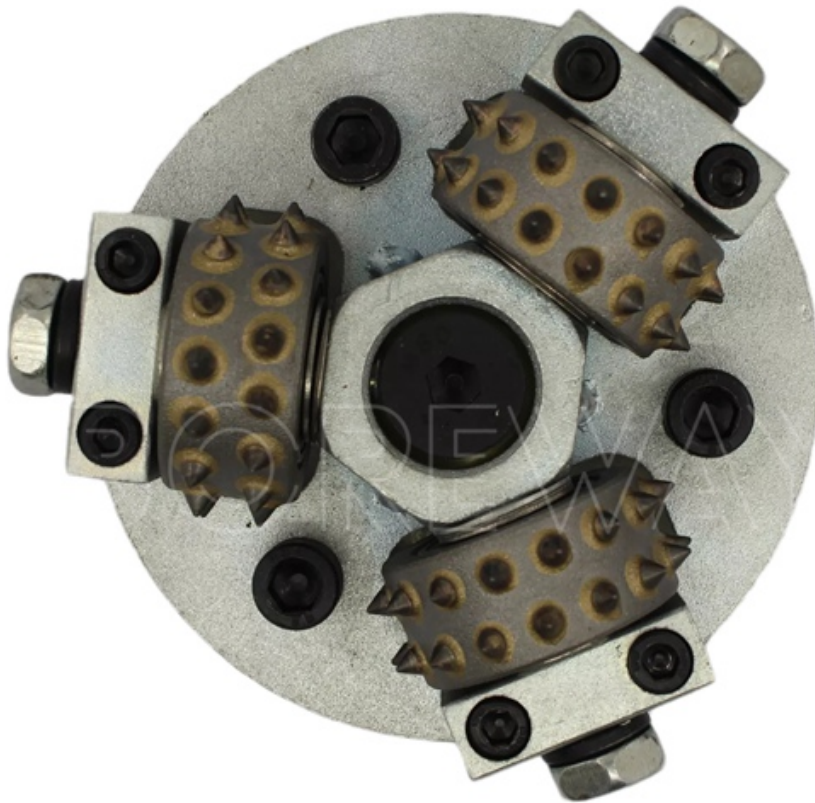

Other specification of bush hammer plate:

FAQ

1. What can Bush Hammers do?

- Make a safe non-slip surface on natural stones.
- Remove old glue and resin coatings, especially thick resins.
- Eliminate any surface and create an antique surface.
- Prepare the floor before laying a new coating.
- Expose the aggregate to the concrete floor to prepare for concrete polishing.

2. Will the teeth of the bush hammer roller fall off?

Of course not, We use high-strength flux to weld the carbide tip to the grinding wheel. The grinding wheel is sturdy and durable, with a long life, and the tip is not easy to fall off.

3. Do you provide many kinds of Bush hammer tool?

We provide 30s, 45s, 60s and other various bush hammer wheels, as well as multi-brand floor lychee surface grinding blocks and grinding discs.
