

Introduction:

Automatic Welding Lifting Rack for Diamond Saw Blades can weld diamond saw blade from $\varnothing 240\text{mm}$ to $\varnothing 900\text{mm}$ (Max $\varnothing 1400\text{mm}$ can be welded after being boosted 500mm high). Compared with similar welding machine with a high level of automation, positioning accuracy, stability, and long service life. This series of products using user-friendly design, general workers can operate on the machine.

Feature:

1. Welding diameter range: 240 ~ 900 mm.
2. Cylinder clamping saw blade base to ensure welding accuracy.
3. Small size, light weight, simple operation, general training can be operated simply.

Specification:

Specification of Automatic Welding Lifting Rack for Diamond Saw Blades:

Model No: BWM-HJ08	
Welding Range	$\Phi 240\text{mm} - 900\text{mm}$ (Max 1400mm)
Verticality	$\leq \pm 0.3\text{mm}$
Parallelism	$\leq \pm 0.3\text{mm}$
Welding Rate	4-20 PCS/Min
Air Pressure	0.3 - 0.6Mpa
Water Pressure	$\geq 0.2\text{Mpa}$
Voltage	220V (Single-phase)50Hz
Power(From LED Light)	1.0W
Water Consumption	1.5 - 2m ³ /h
Machine Dimensions	L940*W440*H1440mm
Equipment Weight	85Kg
Package Dimensions	L1600*W520*H550(Horizontally)
Package Weight(Wooden Package)	115Kg

Note :This machine doesn't include high frequency Welding machine , air compressor and water pump.
