

Introduction:

Fully Automatic Welding Machine for diamond saw blade BWM-CY160A has high degree of automation, simple operation, can automatically complete all welding process.

This product uses the computer touch screen control, human-machine interface operation. The pneumatic driving gear, fault alarm display operation; Lifting of the cutting tools, clamp/saw blade of the cutting tools, welding time, welding gear, cooling time, skip welding parameters such as may be adjusted according to own actual need. A high degree of automation, simple operation, and can complete all welding process automation.

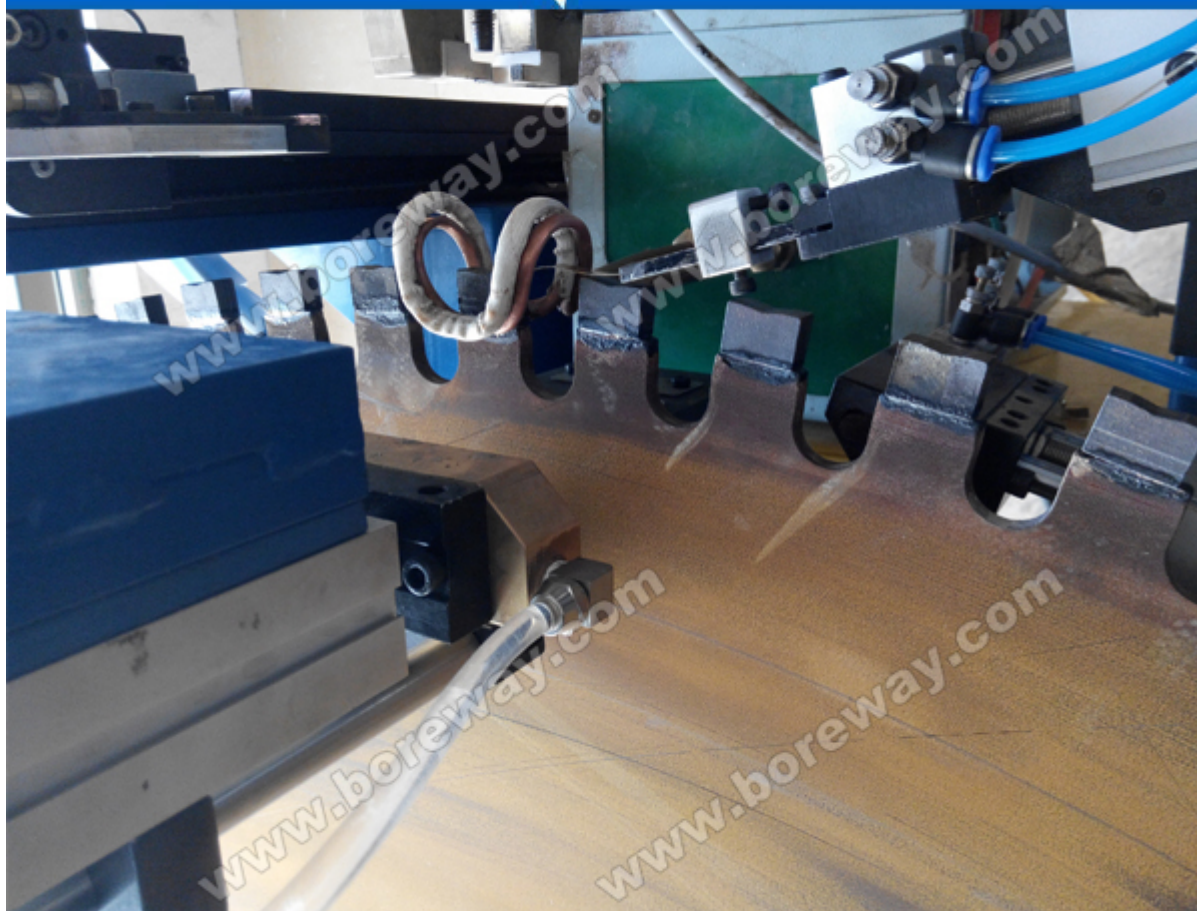

Specifications:

The followings are the normal specifications of our BWM-CY160A fully automatic welding machine for diamond saw blade:

Welding Diameter	mm	Φ600-Φ2200
Welding error□Verticality□	mm	±0.03
Welding Capacity□pc/h□	Pc/h	180-460
Air Pressure	Mpa	0.6
Hydraulic Pressure	Mpa	0.2
Power	W	2200
Water Consumption	m ³ /h	1.5
Weight	Kg	270
Size	mm	1000*950*2445

Usage Scenario:

boreway®

Boreway Machinery Co., Ltd.
