

Introduction:

These diamond sintered continuous turbo blades are widely used on manual hand held cutting machines for cutting and nondestructive grooving on marble, granite, ceramic tile, concrete and many other general construction materials.

Features:

1. Universal dry or wet cutting blade.
2. Designed for hand held circular saws and most angle grinders.
3. Turbo teeth offer fast and smooth cutting, free chipping, high performance/price ratio.

Specifications:

The followings are the normal specifications of our diamond sintered continuous turbo blades:

Product Name	Outer Diameter		Segment Width		Arbor	Segment Height	Applications
Diamond Sintered Continuous Turbo Blade	inches	mm	inches	mm	mm	mm	Marble Granite Porcelain Tiles
	4"	105	0.070"	2.0	16/20	8mm	
	5"	127	0.080"	2.2	22.23	8mm	
	7"	178	0.095"	2.4	25.4/50	8mm	
	9"	229	0.110"	2.8		8mm	

The above specifications are for reference, other specifications can be ordered by customers.

Note: These blades process wide turbo teeth and narrow turbo teeth (with letter N in item No.), and may be with flange (With letter F).

Grade: Premium, Standard.
