

Introduction:

Copper bonded diamond polishing pads that will substantially last longer than any resin bonded diamond pads on the market. Although they are copper bond polishing pads and 3mm thick, they are still very flexible for bullnose, radius, and bowl use.

These Copper Diamond Polishing Pads can be used wet. Use the 30, 50, 100, 200 grit to shape and start the polishing process. They will seamlessly switch over to the standard 400 grit polishing pads to finish the polish.

Feature:

1. Low price and good quality
2. High sharpness, greatly improving the cutting efficiency
3. Does not change in the color of the stone itself, with glazing fast, good brightness and not fade

Specification:

Specification of Copper Bond Flexible diamond polishing pad for polishing stone concrete ceramic

Material	Diameter	Thickness	Grit	Quality class	Applicable	Holder
Diamond&metal	100mm	3mm	30# 50# 100# 200# 400#	Premium Standard Economical	Natural stone Artificial stone Concretes Ceramics	Velcro

Other thickness and diameter can be customized according to need.
