

## Product description

### Brief introduction:

Black D125\*M14 corrugated segment hot press and sinter diamond cup grinding wheels are mainly used for grinding surface and edge of granite marble concrete and other materials. With the advantages of convenient use and high grinding efficiency, it is the most effective tool for face grinding, trimming of stone and concrete. It is usually used on small handheld electric or pneumatic grinding machines, it can also be used on large grinding machines, like continuous grinding machines.

### Features:

- 1 These cup grinding wheels are made by hot pressed and sintered, longer lifespan and grinding effect stronger.
- 2 We carried out the balancing test before leaving the factory, to make sure that jitter does not occur during use.
- 3 The design with good sharpness be provided with easy dust removal, low noise and low pollution.
- 4 Small volume, more convenient to use in handheld machine.

**All of our products have been strictly tested before access to market.**

**Other specifications can be customized according to requirements.**

## Products Details

### The specification of diamond cup grinding wheels:

| Diameter | Thickness | Connection            | Grit | Application materials                                  | Application machines                                                                      |
|----------|-----------|-----------------------|------|--------------------------------------------------------|-------------------------------------------------------------------------------------------|
