

Product Description

Dia.19mm **Vacuum brazed diamond drill core bit**

3/4" **Vacuum brazed diamond dry drilling bits with 5/8"-11 thread** connection

Vacuum Brazed Diamond Drill Bits use for Granite, Marble, Engineered Stone, Quartz Stone, Ceramic, Masonry, Concrete, Tile, Glass, Porcelain, etc...

This special Vacuum Brazed diamond technology allows an uncomplicated, hands-free and clean drilling on angle grinders. The Vacuum diamond coating allows fast drilling with extremely clean, chip free holes.

Vacuum Brazed Diamond Core Bits are designed to drill hard and brittle materials such as ceramics, porcelain, marble, granite, stone materials. Also materials such as stoneware, glazed clinker and hard roof tiles can also be drilled. This **Vacuum Brazed Diamond Core Drill Bits** adopt the vacuum brazed technology to weld the diamonds on the edge of the steel barrel. High diamond concentration and excellent welding strength provides a good sharpness and superior lifespan to this core drill bit.

Specification: Vacuum Brazed Diamond Drill Core Bit with 5/8"-11 thread

Diameter 19mm, 5/8"-11 connection

Max working depth 50mm

Diamond height 15MM

Total height 75MM

Color: Black

Feature: Vacuum Brazed Diamond Drill Core Bit with 5/8"-11 thread

1. Long lifetime
2. Less Chipping
3. Better finish quality
4. Less loss of material
5. Less heat generation
6. Fast and Smooth drilling
7. Minimizing any breakage

Notice:

Dear Customer, Please notice that these diamond drilling bits' thread is **5/8"-11**, not M14. Usually these diamond drilling bits with 5/8-11 thread are used in North America like USA, Canada.

Diamond drilling bits with M14 thread are used in Europe market, such as Russia, Netherlands, Czech Republic and so on.

So please check and confirm whether you order the right thread or not.

Thank you.
