

Introduction:

Diamond bricks with water groove are designed for high performance machines of granite and machines with a head.

The diamond bricks with water groove are sintered at high temperature.

Used to processing all kinds of hard materials such as marble, granite, terrazzo, etc and improve the precision,

especially suitable for full-automatic production line of granite polishing, good sharpness, strong cutting ability, durable and cost-effective.

Used on automatic and semi-automatic polishing machines..

The diamond brick includes the metal bond brick and aluminum bond brick.

Feature:

1. Good polishing efficiency.
2. Long using life.
3. The highest quality.

Specifications:

The are the normal specification of the diamond bricks with water groove:

Length	Height	Water Quantity Needed	Grit No.	Water Groove
130mm	15mm	Big	#35/40, #50, #60, #70	Without
140mm	16mm		#80, #100, #120, #140	With or Without
170mm	20mm		#170, #200, #230	With or Without

The above specification just a reference for clients. Other specification can be ordered by customers.
