

Feature

Abrasive brush is used to process all kinds of stones , which can not only make the slabs skid-proof , but also obtain antique style.

The larger the mesh, the finer the nylon brush wire. There is a touch row with coarse to fine mesh, which can grind out the antique effect.

The natural stone and artificial stone are treated to show the natural texture and crystal texture structure of the stone, achieve the effect of forged surface mercerization and antique surface, and improve the antifouling and waterproof performance of the stone. The treated stone surface has excellent anti-skid effect.
