

Product Description

T shape diamond segment for granite,stone.it has high cutting efficiency, excellent abrasiveness, and long working lifetime. It makes the stone get neat cutting seam and good appearance.

T shape segment side face design improve ideal debris removal and better cooling ,reduce the interface between the blade and stone this will minimize cutting friction and noise.

diamond segments from professional supplier.Good cutting result. This special design will not allow easy edge collapse, break, tapered slab etc.

The Segment works in low noise and small cutting slot which ensures maximum use of stone and uniform thickness.

Feature:

- 1.Good self-sharpness. With stable processing efficiency.
- 2.The T-shaped design reduces the interface friction of the blade, makes the diamond exposed quickly, has high efficiency, and has good debris removal and better cooling effect.
- 3.Cooling effect is good. The three-step design has low side friction resistance, which is not only beneficial to protect the blank body, but also greatly improves chip removal and cooling of the segment.

Product Specification:

The Following Are Normal Specifications **t Shape Diamond Segment For Granite Supplier:**

Segment Shape	Segment Size	Application
T Shape	L20× T3.6/3.3/3.0× H15(20)mm	Granite Stone Cutting

The above specifications is only for reference, other specifications may be available as per customer's demand.
