Tips: Diamond Bond Choice

Soft Bond - For hard concrete, between 4000 and 5500 psi. The bond must be softened to expose the diamond crystals to grind the hard surface. Hardened concrete consists of hardened granite, quartz, river stone, flint.

Medium bonds - for medium concrete, between 2500 and 4000 psi - are the suggested, most popular and most common bonds used in most cases. For use on common pit gravel and / or medium river stones, traprock, crushed gravel floors. Soft and hard bonds are usually reserved for extreme (unusual) cases.

Hard Bond - For soft concrete, typically below 2500 psi. Bonds have rigid metals in their matrix that withstand friction, so diamond crystals are not kicked-out before the surface has a chance to work. Soft concrete consists of limestone, sandstone, dolomite, soft shell.

We also offer super soft bonds at 5500 psi for additional hard concrete. And super hard bonds for extra soft concrete.

### Application:

## **Werkmaster Diamond Concrete Grinder With Single Bar Segment Size 40x10x10mm 16 Grit Soft Bond**

Design for Epoxy, glue, paint, concrete floors, leveling adhesives, thin coating and uneven spots or joints.

Grinding shoes are designed for grinding and polishing concrete floors. Boots / Cakes come with soft bond, rigid bond and standard medium bond and mixed grits. These concrete diamond grinding shoes fit into the fast change style piece and polishing heads.

#### **Features:**

- 1) Segment size: 40x10x10mm, 24x10x10mm etc
- 2) Segment Shapes: Rectangle, Round, Arrow, Oval, Rhombus etc
- 3) Grit: Coarse, Medium, Fine(6#,16#,20#,30#,60#,80#,150#,220# etc)
- 4) Bond: Super Soft, Soft, Medium Hard, Hard, Super Hard

#### **Advantages:**

- 1) Combination of superior diamonds and an extremely durable and unique matrix
- 2) Removes stock quickly and efficiently to greatly reduce your product and labor cost
- 3) Lasts much longer than competitive products and will not glaze
- 4) Amazing results on most types of concrete from soft to very hard
