1.The cutting is smooth and smooth, the cutting seam is small, and the forming is accurate.

2.Corrugated tooth shape, fast chip removal, conducive to cutting, high cutting efficiency

3.With T-shaped reinforced protection teeth, the service life of the saw blade is longer.

Question :

1. Granite is a hard, crystalline rock that is composed of a variety of minerals, including quartz, feldspar, and mica. It is commonly used for building and construction. Granite is a type of igneous rock that forms from the cooling and solidification of magma or lava. It is characterized by its coarse-grained texture and is found in a wide variety of colors and patterns. Granite is a popular choice for countertops, floors, and walls due to its durability and aesthetic appeal.
2. Limestone is a sedimentary rock composed primarily of calcium carbonate (CaCO₃). It is formed from the accumulation and compaction of organic remains, such as shells and skeletal structures of marine organisms. Limestone is commonly used in construction for building blocks and aggregates. It is also a key component in the production of cement and steel. Limestone is found in various colors, including white, tan, and grey.
3. Sandstone is a sedimentary rock composed of sand-sized grains of quartz, feldspar, and other minerals. It is formed from the accumulation and compaction of sand, which is typically derived from the weathering of igneous rocks. Sandstone is commonly used in construction for building blocks and aggregates. It is also used in the production of glass and ceramics. Sandstone is found in a wide variety of colors and textures.
4. Marble is a metamorphic rock formed from limestone through the process of recrystallization. It is characterized by its distinctive swirling patterns and is commonly used in architecture and sculpture. Marble is a type of igneous rock that forms from the cooling and solidification of magma or lava. It is characterized by its fine-grained texture and is found in a wide variety of colors and patterns. Marble is a popular choice for countertops, floors, and walls due to its durability and aesthetic appeal.

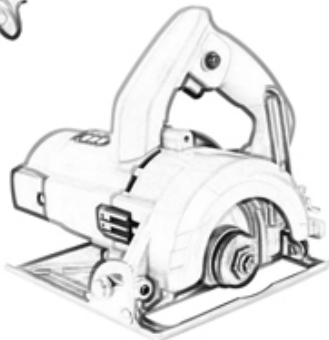

Hand Operated Cutting Machine :

The hand-operated cutting machine is used to cut a hole in the concrete floor.
