

Introduction:

Aluminum Based Diamond Turbo Grinding Wheel M14 or 5/8-11 Thread diamond grinding cup wheel are designed for fast rough dry or water-cooling grinding and sharpening of marble and granite surfaces, cormers edges and and angles,comes in aluminum base providing light weght and fast cooling effect by high comductivty.

Aluminium cup wheels, This aluminium base diamond stone grinding cup wheel are mainly used for stone grinding on the manual grinding machines, the thread could be in M14, 5/8-11 or 22.23mm. It's the most cost-effective diamond grinding cup wheel for your stone.

Grits 30# diamond grits provide high efficiency and longer working life;

Grits 120# diamond grits provide great finishing and much longer working life.

Applied Machine: Most floor grinders plate

Application: For Granite, marble, concrete, block,etc.

Useage:These grinding wheels are great for any type of concrete constuction work, they can also be used for aggressive stock removal with granite,marble,limestone,Terrazz.. Use wet or dry.

Feature:

1. Resin filled help to get better finishing, less scratch;
2. Aluminum base provide light weight and lower noise;
2. Hot-Pressed segments, efficient and smooth grinding;
3. Characterized by high working efficiency and using easily;
4. The diamond cup wheels include single row and double row;
5. It attaches to hand held grinders and floor polishing machine;
6. Applicable for fast grinding, rough deburring and smooth shaping and finishing of stones, masonry materials.

Specification:

Aluminum Based Diamond Turbo Grinding Wheel M14 or 5/8-11 Thread diamond grinding cup wheel

(NOTE: 5/8-11 Thread, it's suitable for North America Market, please attention!)

Diameter	Connection	Segment Size	Grit
5inch/100mm	M14 or 5/8-11	7mm thickness	30#

Other diameter or specifications can be customerized according to buyer's requirments.
