

## Introduction:

Diamond Wire Saw Coupling Joint Sleeve Wire Saw Rope Accessories has the main function of the crimping like; steel lock in the diamond wire. Joint is used for crimping and holding the both ends of the inner carrier wire. We produce two types of joint sleeves from high quality mild steel materials and high purity copper materials. Our high annealing treatment on steel joints makes it soft to avoid breaking problem and electroplating on surface to prevent rust. The type has Spring, Plastic, Rubber, it is essential part of the wire saw, it must have smooth ends and high quality carbon steel.

## Application:

Boreway Machinery Co., Ltd.
