

Introduction:

The BWM-HP50-L cold pressed machine is designed for pressing and processing multi-layers diamond segments, such as sandwich diamond segments. The control system uses new industrial PLC man-machine interface technology, reliable, intuitive and easy to understand. Its max pressure can up to 50 ton.

Features:

1. Press many layers without granulation.
2. PLC servo control system, low failure rate.
3. Key parts are imported devices, long life.
4. Multi-layers feeding, improve the maximum accuracy.
5. Oriented software operating system, especially easy operation.
6. Activity template design, remove and install mold especially convenient.
7. High efficiency, suppress sandwiches segments 8-12 pieces per minute.
8. Online technology changes, particularly flexible and easy operation.

Specifications:

The followings are the normal specifications of our 50 ton hydraulic cold pressed machine:

Parameters	Numerical
Type	BW-HP50-L
Power	7.5 KW
Rated Current	15 A
Finished error	±0.1 g
Efficiency	6 times / Min (3 layers)
Pressing layers	1-9 Layers
Dimensions	1450mm × 850mm × 1750mm
Rated voltage	380V, 50Hz
Working Pressure	50 Ton
Packing depth	1-40 mm
Weight	1.3 Ton

The above specifications are for reference, other or special specifications can be ordered by customers.

We also have [BWM-HP50 Cold pressed machine for diamond segment](#)
