Introduction:

The BWM-HP50-L cold pressed machine is designed for pressing and processing multilayers diamond segments, such as sandwich diamond segments. The control system uses new industrial PLC manmachine interface technology, reliable, intuitive and easy to understand. It's max pressure can up to 50 ton.

Features:

- 1. Press many layers without granulation.
- 2. PLC servo control system, low failure rate.
- 3. Key parts are imported devices, long life.
- 4. Multi-layers feeding, improve the maximum accuracy.
- 5. Oriented software operating system, especially easy operation.
- 6. Activity template design, remove and install mold especially convenient.
- 7. High efficiency, suppress sandwiches segments 8-12 pieces per minute.
- 8. Online technology changes, particularly flexible and easy operation.

Specifications:

The followings are the normal specifications of our 50 ton hydraulic cold pressed machine:

I	Tax and a second
Parameters	Numerical
Туре	BW-HP50-L
Power	7.5 KW
Rated Current	15 A
Finished error	±0.1 g
Efficiency	6 times / Min (3 layers)
Pressing layers	1-9 Layers
Dimensions	1450mm × 850mm × 1750mm
Rated voltage	380V, 50Hz
Working Pressure	50 Ton
Packing depth	1-40 mm
Weight	1.3 Ton

The above specifications are for reference, other or special specifications can be ordered by customers.

We also have BWM-HP50 Cold pressed machine for diamond segment
