

Introduction

High precision brazing frame for diamond circular saw & core drill is a newly developed machinery for the industry. It's easy to operate, precise, stable & high cost to performance ratio, comparing to imported machine. The machine improves the brazing precision & torque strength of diamond circular discs and reduces sharpening & labor cost significantly.

Features:

Display & adjustment device for segment centering adjustment Patented design-arrow point segment clamp. Improved precision & durability. Segment clamp is made of Ceramic alloy material for improved durability & heat resistance.

Specification:

Brazing diameter(for circular saw) 280-1300/280-2000/280-2500(mm)

Maximum segment thickness 18mm, segment height 25mm

Brazing capacity 7-10 discs per hour (for diameter 350mm)

Positioning accuracy : Surface of segment tolerance: ± 0.05 , Blade symmetry tolerance: ± 0.05
