

## **Introduction**

High precision brazing frame for diamond circular saw & core drill is a newly developed machinery for the industry. It's easy to operate, precise, stable & high cost to performance ratio, comparing to imported machine. The machine improves the brazing precision & torque strength of diamond circular discs and reduces sharpening & labor cost significantly.

## **Features:**

Display & adjustment device for segment centering adjustment Patented design- arrow point segment clamp. Improved precision & durability. Segment clamp is made of Ceramic alloy material for improved durability & heat resistance.

## **Specification:**

Brazing diameter(for circular saw)280-1300/280-2000/280-2500(mm)

Maximum segment thickness 18mm,segment height 25mm

Brazing capacity 7-10 discs per hour (for diameter 350mm)

Positioning accuracy : Surface of segment tolerance: $\pm 0.05$ ,Blade symmetry tolerance: $\pm 0.05$
