

Introduction:

Diamond finger bit tip is widely used for milling slots on stone slabs such as kitchen panel, washbasin, etc. This finger bit tip is fabricated with a 1/2" Gas thread connection, easy bit changing, aggressive diamond bond for fast cutting and dependable performance.

Features:

1. High efficiency, long lifespan and fast milling speed.
2. Good balance and stable performance.

Specifications:

The followings are the normal specifications of our diamond finger bit tips:

Product Name	Type	Diameter	Segment Length	Thread	Connecting Shaft
Diamond Finger Bit Tip	Hollow	20mm	20mm	M12	1/2"G*68L
		22mm	30mm		
	Solid	25mm			1/2"G*100L

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Premium.
