

Introduction:

These cutting blade and segment are widely used for cutting sandstone. Ideal edge trimming quality with better blade continuity and narrower segment gap.

Features:

- 1.Refine edge cutting quality.
- 2.High cutting sharpness and high cutting efficiency.
- 3.High cost-effective with extended segment lifespan.
- 4.With high working performance,the blade would not chip or break slates while cutting.

Specifications:

The followings are the normal specifications of our edge cutting blade and segment for sandstone:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Dimension (mm)	Segment Number	Application
Edge Cutting Blade For Sandstone	Ø300	2.2	40*3.2*10(15,20)	22	Marble
	Ø350	2.2	40*3.2*10(15,20)	25	
	Ø400	2.6	40*3.6*10(15,20)	29	
Splitting Blade For Sandstone	Ø450	3.0	40*4.0*10	32	
	Ø500	3.0	40*4.0*10	36	
	Ø550	3.6	40*4.6*10	40	
	Ø600	3.6	40*4.6*10	42	
	Ø650	4.0	40*5.5*10	46	
	Ø700	4.0	40*5.5*10	50	
	Ø750	4.0	40*5.5*10	54	
	Ø800	4.5	40*6.0*10	57	
	Ø850	4.5	40*6.0*10	58	

The above specifications are for reference, other specifications can be ordered by customers.
