

Normal Flat Shape

- 1.Long service life
- 2.Fast cutting speed
- 3.High cutting efficiency
- 4.Good wear resistance
- 5.Good sharpness of blade
- 6.High comprehensive cost performance

Introduction:

- 1.Different market need different quality and sizes. We can make all kinds of sizes and quality or price according your requirement.
2. We can make many kinds of segments for cutting granite, marble, concrete and other industrial materials.

Advantage:

- 1.Sharp diamond tip flat granite in diamond saw blade has good sharpness, fast cutting speed and high cutting efficiency.
- 2.Good wear resistance, long service life and high comprehensive cost performance.
- 3.**Sharp Diamond Tip Flat Granite In Diamond Saw Blade** are Fast cutting, small cutting seam, the cut stone surface is flat and even in size.
- 4.By changing single grinding into the combination of grinding and cutting, the sawing performance is optimized.

Specification:

The following are normal specifications **Sharp Diamond Tip Flat Granite In Diamond Saw Blade**:

Diameter		Thickness	Teeth	Segment Size			Hole	Max. RPM										
Inch	mm	mm	Pcs/set	L	W	H	mm	RPM	64	900	5.0(5.5)	64	40	7.5(8.0)	10/12	60/80	1050	

The above specifications is only for reference, other specifications may be available as per customer's demand.

PS:A certain amount of cooling water should be added when cutting the cutter head, and the spray water flow should be large, so that it has a better cooling effect!

In addition, the speed of the combined saw blade is required to be 280-320 rpm, and the trolley can not be transported too fast!

Product Details:

Sharp diamond tip flat granite in diamond saw blade

Example :

Stone is soft and abrasive therefore we would use a hard bonded blade. Reinforced concrete with river pebble aggregate is hard therefore we would use a soft bonded blade.

Hard Bond

Means that the compilation of metals when sintered together forms a segment of approximately 105 to 120 HRB (hardness) and is very resistant to the soft abrasive materials being sawn, thus releasing diamond at the appropriate rate.

Hard bonds typically consist of the following metal powders – cobalt, iron, tungsten carbide and are grey to dark grey in colour.

Soft Bond

Means that the compilation of metals when sintered together forms a segment of approximately 90 to 105 HRB (hardness) and allows the segment to wear quicker thus retaining diamond on the cutting surface.

Soft bonds typically consist of the following metal powders - copper, bronze and cobalt, and are generally bronze to light silver in colour.

Applications:

Sharp diamond tip flat granite in diamond saw blade using in block cutting for 900-3500mm circular saw blades for block cutting

Diamond segment cutting granite, sandstone, various hard stone with quartz.

Sharp diamond tip flat granite in diamond saw blade only wet use

Applications machine:

Sharp diamond tip flat granite in diamond saw blade used for single or multi circular saw blade from 900mm to 3500mm, cutting of granite, sandstone.

Cutting Effect:

1. If the material is hard, the bond of the diamond segments should be softer.
Because diamonds will become blunt when cutting hard material. Softer bond can be worn down with the blunt diamonds faster, then make new diamonds beneath be more easily exposed to participate in cutting
2. If the material is relatively softer, the bond should be harder.
The diamonds can last longer in this case. The harder bond wears slower, so that it can hold the diamonds also longer. This can make better use of the diamonds and prolong the diamond tool's service life.

Applications machine:

Welding method: **Sharp diamond tip flat granite in diamond saw blade** silver welding by high frequency welding machine

High frequency silver welded machine is recommended instead of welding by fire.

Don't weld diamond segment for a long time, just a few minutes, otherwise the diamond inside might be damaged because of the high temperature, which will affect the cutting performance of the granite segment greatly.

CREDIT CHECKED

by ALIBABA FINANCIAL

This supplier has been Credit Checked by Alibaba Financial:

Lei Zhang from Fujian Nanan Boreway Machinery Co., Limited

The credit check validity period: 2015-10-19 to 2016-10-18

This company has passed a financial assessment (including a credit check) conducted by Alibaba Financial. The scope of Alibaba's financial assessment of suppliers includes, but is not limited to: People's Bank credit archives, business data, Alibaba network behavioral data, corporate and personal balance sheets, court enforcement records.

Our service:

1. Low order quantity: It can meet the test order you need.
2. Fast delivery: We get great discounts from freight forwarders.

3. OEM Acceptable: We can produce according to your samples or drawings.
4. Good quality: We have a strict quality control system. Has a good reputation in the market.
5. Good service: We regard our customers as God with a high degree of professionalism and enthusiasm.

FAQ:

1. If we want to order your product, how do we know your quality?

You can test with a small order, and then you will know the quality. Nowadays, many people in the world use Chinese products because of their high quality and high cost performance. We are a professional diamond tool manufacturer with more than 8 years of manufacturing experience.

2. Can you provide samples for free?

We do not provide free samples. Based on years of experience, we believe that customers will want them because of their reliable quality. By purchasing samples, we will cherish and appreciate them and make them get more. We are ready to offer our potential customers a special discount on samples. It's very important that you give us feedback, and we will appreciate it.

3. Does your company accept customization?

Of course, we accept customization. Including different colors, cutting objects, etc. We can also tag your own label and company brand. If you want us to make any new products for you, just send your products to us. Whether it's drawings or samples, we have the ability to produce the same products. We will not sell these products to others, only customers can get permission.

Please note:

Please use high frequency Silver Welded machine instead of Fire to make the brazing, the welding time is only a few seconds, otherwise the diamond inside the segments will probably be damaged by the high temperature, then the cutting performance will be Reduced!
