

Introduction:

T-shaped segmented saw blades are used on hand held cutting machines for cutting marble, granite, ceramic tile, concrete and other general construction materials.

Features:

1. Universal dry or wet cutting blade.
2. Sintered teeth offer fast and smooth cutting, high performance.
3. Unique design of segments can protect steel core and provide extremely fast cutting.

Specifications:

The followings are the normal specifications of our T-shaped segmented saw blades:

Diameter	Inner hole	Segment height
105mm(4")	20mm 22.23mm(7"/8")	8mm
125mm(5")		
150mm(6")		
180mm(7")		
200mm(8")		
230mm(9")		

The above specifications are for reference, other specifications can be ordered by customers.
