

**Introduction:**

T-shaped segmented saw blades are used on hand held cutting machines for cutting marble, granite, ceramic tile, concrete and other general construction materials.

**Features:**

1. Universal dry or wet cutting blade.
2. Sintered teeth offer fast and smooth cutting, high performance.
3. Unique design of segments can protect steel core and provide extremely fast cutting.

**Specifications:**

The followings are the normal specifications of our T-shaped segmented saw blades:

Diameter	Inner hole	Segment height
105mm(4")	20mm 22.23mm(7"/8")	8mm
125mm(5")		
150mm(6")		
180mm(7")		
200mm(8")		
230mm(9")		

The above specifications are for reference, other specifications can be ordered by customers.
