

Introduction:

These diamond edge cutting blade with W shaped segment are widely used for cutting granite and many other hard stone,mainly used in bridge cutting machines and infrared cutting machines.

Features:

- 1.Unique W design of segment,the V slot allows ideal debris removal and better cooling, reduces cutting friction,which will keep good cutting sharpness and high cutting efficiency.Besides,this creative design will minimize cutting noise.
- 2.Good cutting result. These special design will not allow easy edge collapse,break,tapered slab etc.
- 3.Excellent comprehensive cutting performance.

Specifications:

The followings are the normal specifications of our diamond edge cutting blade with W shape segment:

Product Name	Diameter (mm)	Steel Core (mm)	Segment Dimension (mm)	Segment Number	Application
Diamond Edge Cutting Blade With W-shaped Segment	Ø300	2.2/2.0	40*3.2*10(15,20)	21	Granite
	Ø350	2.4/2.2	40*3.2*10(15,20)	24	
	Ø400	2.8/2.4	40*3.6*10(15,20)	28	
	Ø450	2.8/2.6	40*4.2*10(15,20)	32	
	Ø500	3.2/2.8	40*4.2*10(15,20)	36	
	Ø550	3.2/3.0	40*4.2*10(15,20)	38	
	Ø600	3.6/3.2	40*4.6*10(15,20)	42	
	Ø650	4.0/3.6	40*5.0*10(15,20)	46	
	Ø700	4.0/3.8	40*5.2*10(15,20)	50	
	Ø800	4.5/4.2	40*6.0*10(15,20)	57	

The above specifications are for reference, other specifications can be ordered by customers.
