

Product Description

This high quality bush hammer roll is used on HTC grinders to make Litchi surfaces on stones. **Bush hammer roller on HTC equipment** is designed primarily for texturing and roughening smooth stone concrete surfaces and is especially important for performing operations that create non-slip surfaces on stone floors, steps, etc. It is rollable and highly efficient, for example, a 200 mm diameter roller can create more than 100 square meters of stone surface per day.

Feature:

1. Nice package and excellent service
2. Stable performance and premium quality
3. High grinding efficiency and long work life
4. We can customize a variety of high quality bush hammer tools to meet your specific job requirements. Including: HTC bushings, Klindex bushings plates, Husqvarna bushings rollers, Frankfurt bushings rollers, etc.

Product Specification:

The specification of **bush hammer roller on HTC equipment**:

Row Number	Grains Shape	Fast Connection	Grains Number
3 Rows	Pyramid	HTC Pad	45 Grains

Specification of bush hammer roller:

Model	Out Diameter	Wheel Width	Segment Quantity	Segment Diameter	Remark
