

Introduction:

CNC electroplating diamond profile wheel is suitable for marble, granite and other stone lines, line plate molding, can also be used for grinding of ceramics, glass, jewelry and other materials, with no deformation grinding, fast, good finish, wear resistance good, long life and other characteristics, suitable for CNC machine tools, milling machine, line machine.

Features:

- 1.CNC high production efficiency electroplating diamond profile wheel and grinding deformation, can withstand a large load of work
2. plating process, combined with strong diamond, wear resistance and long service life
3. For CNC machines, grinding more precise

Specification:

We have a 140mm / 200mm / 250mm / 300mm and other conventional specifications, unconventional shape, diameter, height can be customized according to needs.
