

Product Description

Carbide alloy double layer bush hammer plate is a rotary bush hammer plate with a diameter of 300mm, can create litchi surface effect. Wholesales bush hammer rollers are mostly used in marble, granite, sandstone, concrete, asphalt pavement and other materials.

Double Layer Bush Hammer Plate For Manufacturer can be used in the ground of the square, the surface of the stairs, the surface decoration of the building, the background wall of the front desk, the ground of the shower room, the dry hanging of the outer wall, indoor ground pavement, square brick, roadside stone and other engineering garden construction. Other occasions.

The effect of litchi surface is uneven and rough surface effect, which is safe and anti-skid.

Feature:

1. The effect of safety and skid resistance is good.
2. The grinding roller is made of high amount of carbide alloy.
3. The diameters of the **Carbide Alloy Bush Hammer Roller For Manufacturer** segment are: 3.6mm, 4.5mm, 4.6mm, 4.7MM, 6mm and 8mm.
4. Carbide alloy bush hammer plate adopts double-layer grinding disc with spring design, which has seismic effect during processing, reduces the burden of rotary Bush hammer roller and reduces the processing cost

Product Specification:

The Following Are Normal Specifications **Carbide Alloy double layer Bush Hammer Plate:**

Outer Diameter	Wheel No.	Segment No.	Number Of Layers	Roller Type
300MM (12 Inch)	6 Pcs	99 Teeth	Double Layer	Carbide Alloy Bush Hammer Roller

The above specifications are only for reference, other specifications may be available as per customer's demand.

More Normal Specification Of Rotary Bush Hammer Roller:

Model	Out Diameter	Wheel Width	Segment Quantity	Segment Diameter	Remark

Can customize the size of other rotary bush hammers roller as required.

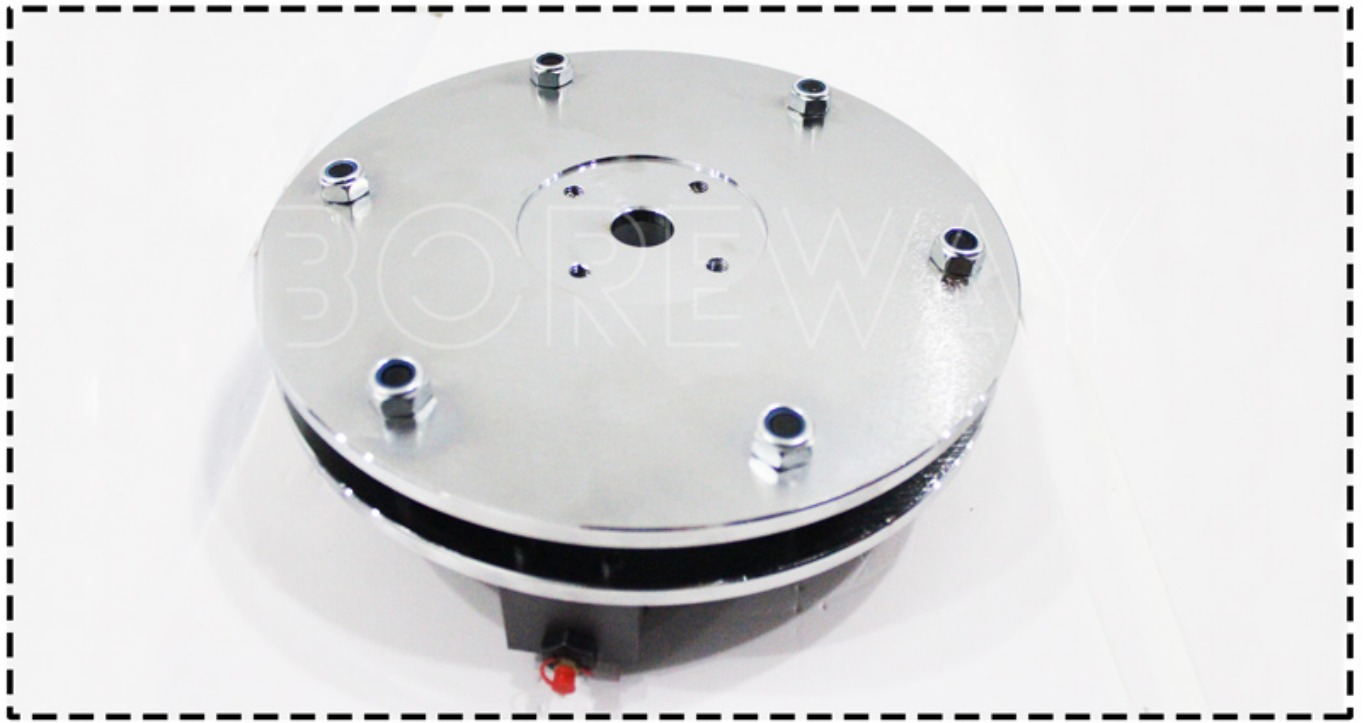

Product show

300mm Carbide Alloy double layer Bush Hammer Plate For Concrete Litchi Finish

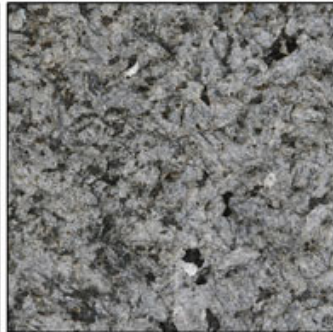

Application:

Bush hammer for concrete finish, marble, granite, sandstone, asphalt pavement and other materials.

Bush hammer nozzle supplier china to process bush hammered litchi surface on concrete granite, marble, and other stone surfaces.

Marble

Granite

Quartz

Sandstone

Limestone

Concrete Floor

Asphalt Pavement

FAQ

1.What is the lychee noodle tool?

Bush Hammers have been around a long time and have proven the easiest way to texturize stone, concrete & asphalt.

2. What can Bush Hammers do?

Surface Prep for coatings.

Quickly expose large aggregate.

Remove hard coatings and overlays.

3.How to use and maintain bush hammer tool?

Do not apply too much pressure on the bush hammer. This will prevent the roller from stopping and thus decrease the life span of the tungsten steel.

After each use, please clean up rollers, dry and apply oil to the spindles. It will be ideal to submerge the rollers in oil to prevent spindle rust.

Roller tips can be re-dressed with diamond blades when they become inefficient.
