

Product Description:

Brief Introduction:

High precision brazing frame for diamond gang saw is a newly developed machinery for the industry. It's easy to operate, precise, stable & high cost to performance ratio, comparing to imported machine. The machine improves the brazing precision & torque strength of diamond circular discs and reduces sharpening & labor cost significantly.

Features:

We adopt easy design of halving to fix the position, which enable the worker to use the rack with basic training.

All of our products have been strictly tested before access to market.

Other specifications can be customized according to requirements.

Details:

Specification of automatic gang saw blade welding rack:

Brazing Length : 4800-5500mm

Brazing thickness : 1.2~3.0

Brazing Height : 90~200mm

Surface of segment tolerance : ± 0.05

Blade symmetry tolerance : ± 0.05

Pictures:

The following shows are only part of diamond gang saw blade welding rack:

Other Products:

High frequency induction welding machine

Packing & Shipping:

Automatic diamond gang saw blade packing in the wooden.

We can also pack the diamond gang saw blade according to your requirements.

Special specifications need to be negotiated for delivery times.
